

Otsable Launches High-Quality Cables for Optimizing Optical Infrastructures

SHENZHEN, CHINA, May 15, 2020 /EINPresswire.com/ -- Optical infrastructures help individuals and businesses communicate with each other. They allow you to transfer large amounts of information at incredible speeds, regardless of how far the distances are. But, building a network infrastructure that can cover long distances and can transmit any size of information is a challenging task. This is where optical cables come in which are ideal for businesses that require heavy bandwidth connections.

Otsable is among the best players in the industry that provide various network accessories for different network layout projects. The company has modernized testing facilities and research equipment that ensure their products comply with international standards. They have acquired CE, UL, ROHS, and ISO9001 certificates. Thus, guaranteeing that their customers only receive top-notch products and services.

Aside from being a factory of communication cables, OTS is also a partner you can trust for growing your business. They can provide you with affordable cables and other network accessories for you to optimize your optical infrastructure. They also provide OEM and ODM services. Below are the products that Otsable offers:

LAN Cables

OTS supplies both patch cables and bulk cables. They have Cat5e, Cat6, Cat6a, Cat7, and Cat8 patch and bulk cables. Their Ethernet cables include UTP, FTP, and SFTP types. They also provide flat and ultra patch cables.
