Face Mask Market 2020

Summary: -□

[global Face Mask](#) shipments was in the range of 6-8%. At the end of 2019, COVID-19 began to erupt in China, many companies began to increase the production of masks, and individuals increased the purchase of masks Due to this situation at the end of 2019, the growth rate of global mask shipments in 2019 reached 15.48%. This is 7 percentage points higher than in previous years.

In 2020, COVID-19 began to explode in China, and a total of more than 80,000 people were diagnosed with COVID-19. The price of China's Face Mask was once more than ten times higher than usual due to out of stock, so many Chinese companies began to produce Face Mask, including large state-owned enterprises, small enterprises, and even electric vehicle companies BYD, has also begun to produce Face Mask. As of now, China's mask production capacity has increased by more than 20 times in 2019. In April, China's epidemic situation was controlled, and the demand for masks fell sharply. However, there are many countries in the world, such as Italy and the United States, Spain, Britain, Germany, etc., Chinese companies began to export masks to all parts of the world.
