

# QubeFall© Teams With CloudNone for Chillout Audio-Synced VR Puzzle Game Experience on Oculus Quest

*VR games publisher Things3D is offering a free, one level taster of arcade puzzle game QubeFall© to Oculus Quest users.*

MANCHESTER, UNITED KINGDOM, May 20, 2020 /EINPresswire.com/ -- [VR](#) games publisher Things3D is offering a free, one level taster of arcade [puzzle game QubeFall©](#) to Oculus Quest users.

QubeFall© Free places players within the audio/visual environment of chill-out maestro CloudNone's epic electronic track WISH (<https://youtu.be/B2KV1c-LEX8>). The psychedelic backgrounds, visual and audio effects, and addictive gameplay are beautifully matched to the officially licensed music from Monstercat.

QubeFall Free featuring Cloudnone

Developed by RealityZ and published by Things3D, QubeFall© offers intuitive, natural controls to build intricate geometric shapes as you grab new blocks out of the air. Race against time to eliminate as many layers as possible before you hit the ceiling.

Players grab the blocks as they fall and assemble them into neat combinations in the playing field. Completing combinations makes the blocks disappear, and racks up the high scores.

"QubeFall is so addictive because it's one of those rare times when a game can only be experienced through VR," says Things3D co-founder Chris Byatte. "It switches seamlessly between an intense, frantic race against time to being a totally immersive, almost zen-like interactive experience."

---

QubeFall© Free is community-supported donationware on SideQuest, allowing players to contribute to the game's development. With enough support, a wide range of new features are possible for the full title, including natural hand tracking controls and additional A/V synced music environments from artist CloudNone.

QUBEFALL© FREE, AVAILABLE AT SIDEQUEST AND ITCH.IO
