

Global Organic Bakery Products Market Segments With Growth Rate And Size

Organic Bakery Products Market Global Report 2020-30: COVID 19 Growth And Change

LONDON, GREATER LONDON, UK, May 21, 2020 /EINPresswire.com/ -- The global organic bakery products market is expected to grow from \$9.5 billion in 2019 and to \$9.7 billion in 2020 at a growth rate of 2.5%. The slow growth in 2020 is mainly due to the economic slowdown across countries owing to the COVID-19 outbreak and the measures to contain it. The market is then expected to grow and reach \$11.6 billion in 2023 at a rate of about 6%. Increasing consumer preferences towards healthy ingredients is a major driver for the organic bakery products market. However, certifying and labeling organic bakery products follows very strict and unwavering guidelines, which is hampering the growth of the organic bakery products market.

The organic bakery products manufacturing market consists of sales of organic bakery and related products. Organic bakery products are made using organic ingredients such as wheat gluten, milk, butter, honey, eggs, oils, starch, sugar, spices, raisins, cereals, grain flours and meat-based ingredients. To meet the requirements of organic certification, the manufacturers produce organic bakery products as per the set guidelines of the food safety organizations of their respective countries.
