

Turnkey Cybersecurity and Privacy Program Developed For Mortgage Industry Companies All Sizes

Affordable Turnkey Cybersecurity and Privacy Program Solves Security Problems for Mortgage Industry Companies of All Sizes

DENVER, CO, UNITED STATES, May 28, 2020 /EINPresswire.com/ -- Finally, a cybersecurity company has come up with a turnkey solution to address the complexities and costs associated with cybersecurity and privacy compliance requirements facing the [mortgage industry](#).

The company is Turnkey Cybersecurity and Privacy Solutions, LLC (TCPS) of Denver, CO. They have developed everything small to medium-sized mortgage industry companies need to build and maintain professional cybersecurity and privacy programs that are in compliance with increasing state and federal cybersecurity and privacy regulations.

“

Our programs won't solve the problem for every small mortgage company, but they will solve the problem for most of them.”

Mitch Tanenbaum

It's no secret that mortgage industry companies firms have been targeted by global adversaries and home grown criminals because these firms possess so much sensitive client financial data. Because of this, regulators and borrowers are increasingly concerned about how such

companies protect the data they are responsible for. Everyone knows that a data breach can destroy the value and reputation of such firms.

And the old "honor system" of regulatory enforcement is just not cutting it. Regulators are preparing to get more serious about protecting the general public and the security of the IT infrastructure of technology companies. While the Department of Defense (DoD) is leading the charge with implementation of its new Cybersecurity Maturity Model Certification (CMMC), other federal agencies and states are likely to follow suit with more aggressive regulatory

enforcement.

As a result, hundreds of thousands of small to medium-sized mortgage companies (like mortgage lenders, title companies, service companies) are struggling with the complexities and costs associated with meeting increased cybersecurity and privacy regulatory enforcement. As anyone who has tried it knows, building and maintaining a professional cybersecurity and privacy program that meets the standards set by the NIST Cybersecurity Framework (CSF), GLBA, NY DFS 500, and new privacy regulations like the California Consumer Privacy Act (CCPA) is no cakewalk.

The good news is that while building a cybersecurity program is undoubtedly difficult and time-consuming, it is a well-known process. We do not need to re-invent the wheel. We just need to methodically do what we know needs doing... and it has just been made a lot easier and more affordable.

A Denver-based, full-service cybersecurity company that has been helping mortgage companies comply with cybersecurity and privacy requirements for years has developed and spent two years testing what they call "turnkey" solutions. The company, [Turnkey Cybersecurity & Privacy Solutions, LLC](#) (TCPS) has just released multi-level, comprehensive cybersecurity and privacy programs - including pro-active support for firms as small as 1-5 people. Their turnkey solutions are customized to the organization's size and the level of security required by any compliance requirements or customer demands.

"Small mortgage companies simply do not have the knowledge, resources or bandwidth to build and maintain a real cybersecurity program," says Ray Hutchins, Managing Member of TCPS. "We have seen this play out time and time again over the years. We finally decided to standardize the process to the extent possible and provide everything a smaller mortgage company requires to build and maintain a professional-level program that actually addresses their cybersecurity needs. We even have a program for firms with 5 or less staff that costs less than \$2,000."

TCPS is a spin-off from [CyberSecurity LLC](#), a full-service cybersecurity and privacy company headquartered in Denver, CO and operated by Ray Hutchins and Mitch Tanenbaum. TCPS, LLC is the only company in the world that offers turnkey cybersecurity and privacy programs to small and medium-sized accounting and other companies in the United States.

Hutchins' partner, Mitch Tanenbaum, started his cybersecurity career 30 years ago while architecting and building the cybersecurity infrastructure for Texas Instruments Defense Systems. He also has 15 years hands-on experience in the mortgage industry. "Ray and I take the threat to national security and our country's intellectual property seriously. We know what it takes to build a professional cybersecurity program and we have spent years baking our knowledge into our TCPS programs," Tanenbaum says. "Our programs won't solve the problem for every small mortgage company, but they will solve the problem for most of them. We welcome industry experts and influencers to take a hard look at our approach and offerings. We

are proud of what we have achieved and know it will make a difference for those who embrace and use our system."

All levels of the TCPS Mortgage Industry Companies Program include the following:

1. Continuously updated program governance tools, content, processes, and procedures
2. Continuously updated training and other content
3. Reactive and pro-active technical and program support
4. Vetted third-party cybersecurity tools

It's a new way of using existing technologies to attack this difficult problem. The programs are an assemblage of content, processes, vetted tools, and support - all organized within a shared, secured, and continuously updated Google environment.

"Think of our programs as a holistic approach to cybersecurity and privacy. You don't have to be an expert in cybersecurity or the compliance regulations. We help you with that," Hutchins says. "What is required is strong company leadership, along with a real commitment to allocate the time and resources required to make it happen. In our experience, this is the most cost-effective and manageable way to quickly build a professional cybersecurity program."

About Turnkey Cybersecurity & Privacy Solutions, LLC (TCPS)

TCPS LLC, founded and operated by experienced cybersecurity and privacy professionals, builds and supports multi-level turnkey cybersecurity and privacy solutions for multiple industries.
