

Koligo Therapeutics to Participate in Maxim Group and M-Vest COVID-19 Virtual Conference Series on May 27, 2020

NEW ALBANY, INDIANA, UNITED STATES, May 22, 2020

/EINPresswire.com/ -- [Koligo](#)

Therapeutics, Inc. (Koligo), a privately-held regenerative medicine company, today announced that Matthew Lehman, Chief Executive Officer, will be participating in the Maxim Group and M-Vest [COVID-19 Virtual Conference Series: The Role of Cell Therapy and Clarity on Testing](#) on May 27, 2020 at 10:00am Eastern U.S. Time. Interested parties can access the discussion as part of the Maxim Group and M-Vest COVID-19 [Virtual Conference Series](#).

The archived discussion will be posted on the News section of Koligo's website the day following the event and will be available for 30 days.

About the Maxim Group and M-Vest COVID-19 Virtual Conference Series

The unmet need in infectious diseases cannot be overstated and COVID-19 continues to be a stark reminder of how unprepared the world is to deal with a pandemic. SARS-CoV-2, the virus that causes COVID-19, while sadly is still inducing tremendous loss of life, has brought out the very best in the biotechnology community from a drug, vaccine, and testing perspective. In this iteration of our ongoing M-Vest Infectious Disease Virtual Conference Series, we focus in on two key areas related to the ongoing pandemic; cell-based therapies and testing. Please join us as we break it down with two panels of companies leading efforts in cell therapies and testing for COVID-19.

About KT-PC-301

KT-PC-301 is a potential cell therapy in development for patients with moderate to severe COVID-19. Derived from a patient's own adipose (fat) tissue, KT-PC-301 contains a population of a patient's own (autologous) cells, including endothelial cells, hematopoietic and mesenchymal stem cells, and white blood cells (T regulatory cells and T and B lymphocytes). The product has

been evaluated for safety and tolerability in several phase 1 studies to date. KT-PC-301 is for investigational use only in the context of an approved clinical trial.

About Koligo Therapeutics

Koligo Therapeutics, Inc. is a regenerative medicine company. Koligo's first commercial product is KYSLECEL® (autologous pancreatic islets) for chronic and acute recurrent pancreatitis. Koligo's 3D-V technology platform incorporates the use of advanced 3D bioprinting techniques and vascular endothelial cells to support development of transformational cell and tissue products for serious diseases. www.koligo.net.
