The travel industry and the online hotel booking sector have undergone a major transformation due to technological enhancements and digital trends. Additionally, the increasing penetration of mobile applications for online travel booking is expected to boost the market's margin over the next few years. Furthermore, the hospitality industry has played a crucial role in increasing the global market for online travel bookings. Most hotel owners support digital platforms to make use of the digital revolution, as internet penetration is growing across the globe. Online travel agencies such as Booking Holdings, Expedia, Trips, etc. are crucial players in the global online travel industry, providing services such as promotions, information sharing and transactions that benefit both service providers and consumers of hotels. Moreover, in recent times consumers are preferring online method of booking because of its features such as easy booking, easy payment, etc. Additionally, innovative services such as easy and safer payment modes, twenty-four-seven services accessibility, easy and free cancellation, online charges comparison for hotels and transportation, easily installed application, etc. Thus, the aforementioned parameters may positively influence on the online travel market over the future years. The sharp increase in internet subscribers due to the mass acceptance of the online travel market is expected to boost the market's profits over the coming years, Supported by the fact that, the online travel market is likely to grow due to rising disposable incomes of customers.

Online travel booking industry report is segmented based on service, mode of booking and platform. Service-wise, the market is classified into transportation Booking, accommodation booking, and Others. Amongst the service-wise segment, the transportation booking segment held the leading share and accounted for approximately 52% in 2019. The reason for the growth in this segment is majorly dependent on the facility of pre-booking the transportation mode. In terms of mode of booking, the market segment is sectored into online and direct-agency. Direct-agency mode held the leading market share in and accounted for approximately 59% in 2019. Although, the online mode is easier to use, but in the current scenario, the consumers don't feel safe to make transactions online due to safety reasons. Additionally, it is a traditional way so it has more preference. On the basis of the platform, the market is bifurcated into desktop and mobile. On the basis of the platform, the desktop segment had the leading share and was accounted for 70% in 2019. But, according to our analysis mobile segment is expected to witness a significant boost with a CAGR of 13% during the forecast period.
