/EINPresswire.com/ -- Tempered Glass Market:

## Executive Summary

Tempered Glass are type of safety glass which are processed through controlled thermal or chemical treatments as it increases its strength as compared to normal glass. The Tempering of the glass puts the external surface into compression and the internal surface into tension. These stresses cause the glass to crush into small granular chunks instead of splintering hence preventing injuries. This strengthening and safety feature of the glass is utilized in variety of areas like passenger vehicle windows, shower doors, architectural glass door and tables. Mobile phone screen protectors and more. With the growing application of Tempered glass the demand for the product increases which drives the market growth As per Statista, the annual production of reinforced glass amounted to 525 million square meters while in the first 2 months of 2020, the production peaked to 60 million square meters Moreover, the rising adoption of automobiles across the globe drives the market towards growth as these automobiles extensively use tempered glass in door windows and windshields. The growing manufacture of these automobiles increases the demand for tempered glass. Moreover, the rising use of smartphones across the globe fuels the market growth. As tempered Glass is used as protective cover for the screens of the smart phones. Thus, the rising sales of smart phones drives the market towards growth. Moreover, in the North American and European region Tempered Glass is majorly used in the exterior of the buildings with the rising residential and commercial building construction the demand for tempered glasses increase. However, with the
