COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets. The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

Healthcare supply chain management is the regulation of the flow of medical goods and services from manufacturer to patient, it mainly includes hardware and software, the downstream customer mainly includes the manufacture, providers, and distributors.

By end-user, this market includes manufacturers (41%), distributors (41%), and providers (41%), of which the manufacturers dominated the global market in 2016. However, the providers segment, which includes hospitals and other service providers, is anticipated to reflect a higher CAGR during the forecast period. The health care supply chain involves three main groups: manufacturers (manufacturing companies), distributors, and providers (hospitals, pharmacies, and clinics). In terms of component, its divisions include software (revenue market share over 62% in 2016) and hardware (revenue market share about 38% in 2016). The former accounted for a major share in the global market in 2016, due to increased adoption of the supply chain management software, and rising applications such as customer relationship management and execution of value chain transactions. This segment is expected to register a prominently high CAGR (about 9%) during the forecast period.

The following players are covered in this report:

McKesson

SAP SE

Oracle Corporation

Infor

HighJump

Manhattan Associates

JDA

TECSYS

Kinaxis

Blujay Solutions

Jump Technologies

LogiTag Systems

Key Players

Interviews with major market players, innovations, key developments, and history aspects of notable key players are discussed in this report. Reputed players function in the Global Healthcare Supply Chain Market are observed to play major roles in alterations of the market dynamics. The report mentions several factors induced by noteworthy players of the Global Healthcare Supply Chain Industry expansion. The rise in funding by these players for different development projects, application of modern technology, and key marketing strategies are revealed in the report.

Segment Study

Component and type are chief parameters deployed to carry on a segment study the Global

Healthcare Supply Chain Market. Demographic factors and geographic causes are studied under regional segment study and explained distinctly in the years to come. The wider insights offers by the segment study can help in the predicting better growth prospects and observe ongoing trends. The comprehensive knowledge on the Global Healthcare Supply Chain Market can deliver effective means to resolve upcoming issues associated with Global Healthcare Supply Chain Market.

Healthcare Supply Chain Breakdown Data by Type

Software

Hardware

Healthcare Supply Chain Breakdown Data by Application

Manufacturers

Providers

Distributors

Report covers:

Comprehensive research methodology of Global Healthcare Supply Chain Market.

This report also includes detailed and extensive market overview with gap analysis, historical analysis & key analyst insights.

An exhaustive analysis of macro and micro factors influencing the market guided by key recommendations.

Analysis of regional regulations and other government policies impacting the Global Healthcare Supply Chain Market.

Insights about market determinants which are stimulating the Global Healthcare Supply Chain Market.

Detailed and extensive market segments with regional distribution of forecasted revenues

Extensive profiles and recent developments of market players
