## Description

Forklift truck, also known as fork truck, lift truck, or forklift, are motorized vehicles primarily used for independent lifting, movement, and placement of discrete loads throughout a facility. They form an essential part of the supply chain market. These mobile loading trucks can be outfitted with forks for pallet-based unit load picking and for loads that are not palletized. These vehicles can be used with a variety of attachments such as platforms, grippers, or clamps. The growth of customer segments and rising demand for fuel-efficient vehicles is bringing a radical change to the global forklift truck market.

The report begins from overview of Industry Chain structure, and describes industry environment, then analyses market size and forecast of Forklift Trucks by product, region and application, in addition, this report introduces market competition situation among the vendors and company profile, besides, market price analysis and value chain features are covered in this report.
