"As a country, we are growing to a place that expects more accountability for cyberbullying—and bullying in general—both on and off school campuses."

For dealing with instances of cyberbullying, Sternberg sheds light on current standards in schools across the nation as well as how these institutions address online bullying and what their limitations are when reprimanding students. "After finishing this book, readers should be more prepared to deal with their own cyberbullying cases, assist or give advice to those experiencing online harassment, and find a satisfactory resolution."
