

Automated Photo And Video Documentation Solution For Microsoft

All Microsoft users can now save 75 percent of time when documenting conditions on site with photos, videos and reports with FotoIN's patented system.

MOUNTAIN VIEW, CALIFORNIA, UNITED STATES, August 18, 2020 /EINPresswire.com/ -- FotoIN

FotoIN is the easiest field visual documentation solution we ever used for our daily reports and regular daily inspections."

Jon Forinnger, Project Controls, AECOM

Mobile Corporation (FotoIN) now fully integrates with [Microsoft](#) to bring its patented visual documentation system to field professionals using Microsoft Office productivity solutions and help them save time when documenting field conditions with photos and videos.

FotoIN today announced the launch of the new full round trip integration and Single Sign-On with Microsoft. FotoIN's patented professional visual documentation solution is now directly connected with Azure and Microsoft 365

including SharePoint (all versions) and OneDrive. Integration is fully seamless with the option to set up an account with the user's existing Microsoft account.

Account set up and login are done with 1 click when using Microsoft and there is no need to set up a password for FotoIN or go through complicated IT steps and procedures to connect FotoIN to your existing Microsoft storage and productivity solutions and services. FotoIN [automated](#) the workflow end-to-end, including data and media filing, naming, organization and administration to further simplify visual documentation capture and management across field heavy use cases in field heavy industries like AEC, Real Estate and Insurance.

With FotoIN's mobile app Microsoft users now finally get the best in class and easiest way to capture photos and videos on site with associated data. Smart visuals including all the field data make the documentation more actionable with direct real time connection between FotoIN and Microsoft's [enterprise](#) collaboration and productivity solutions and services, in cloud or on premise with SharePoint and personal OneDrive.

"By automating and streamlining the authentication, storage, filing and data connection with Microsoft, more project teams will be able to capture and manage photos and associated data across Enterprise using FotoIN mobile, web and desktop applications with the photos and data automatically organized to appropriate storage option and folder hierarchy in Microsoft's

SharePoint or OneDrive storage, saving users 75% of time in the field and office.” Sly Barisic, CEO and Founder of FotoIN explained and continued: “Microsoft is already the best known and most used solutions’ provider in the field heavy industries like Construction, Real Estate and Insurance. Starting with Sharepoint, then productivity suite on the office side, and now finally also easy to use on mobile devices in the field. Since Microsoft doesn’t have a dedicated mobile app for photos or videos, FotoIN is closing the gap and giving all Microsoft users an easy way to capture, file, organize and use their visual documentation just like our customers J.E. Dunn, AECOM and W.M. Jordan. Now all Microsoft users can also easily do field photos, videos and reports and automatically save and sync, in real time, directly from the field, without losing security, ownership or ability to manage across the organization, platforms, devices, user groups etc., just like with Microsoft”

It's never been easier to check out FotoIN and try it for free, now also with Microsoft. Learn more at www.fotoin.com or try it out by downloading the mobile app on your device.

About FotoIN Mobile Corporation

FotoIN Mobile Corporation (FotoIN), the leading provider of business photo documentation solutions, with patented end-to-end, best-in-class field photo documentation and reporting technology that is easy, actionable and open. Field users just snap and tag photos and reports, and FotoIN takes care of the rest, including automated filing to customers’ existing storage, project management and other systems, directly from the field. FotoIN delivers significant cost savings through reduced dispute resolution costs, and increased productivity and efficiency across the organization in field heavy industries including Restoration, Construction, Engineering and Property Management. Used by AECOM Tishman, ATI Restoration and Regency Centers, FotoIN has been recognized for its innovative solution by the Technology Association of Georgia. The mobile app is available for download in Apple's App Store and on Google Play.

About Microsoft 365 and SharePoint

SharePoint is a leading enterprise, mobile, intelligent intranet where users can share and manage content, knowledge, and applications to empower teamwork, quickly find information, and seamlessly collaborate across the organization. Microsoft 365 (formerly Office 365) applications and solutions, including OneDrive, are designed to help you achieve more with innovative Office apps, intelligent cloud services, and world-class security.
