Global 3D Medical Imaging Market Segments And Growth Rate, 2030

The Business Research Company's latest study on 3D Medical Imaging Market Global Report 2020-30: Covid 19 Growth And Change

LONDON, GREATER LONDON, UK, June 3, 2020 /EINPresswire.com/ -- The global 3D medical imaging market is expected decline from $14.3 billion in 2019 to $13.7 billion in 2020 at a rate of -4.4%. The decline is mainly due to economic slowdown across countries owing to the COVID-19 outbreak and

3D Medical Imaging Market Global Report 2020-30: Covid 19 Growth And Change

the measures to contain it. The market is then expected to recover and reach $16.9 billion in 2023 at a rate of 7.4%. Increasing cases of injuries such as sports-related injuries contribute to the growth of the 3D medical imaging market. The difficulties faced by the medical device industry owing to the COVID-19 outbreak such as the slowdown in orders and supply chain disruptions are likely to restraint the growth of the 3D medical imaging market over the next few years.

The 3D medical imaging market consists of sales of 3D Ultrasound, X-Ray, CT scan, MRI, Hybrid Imaging equipment and related services. 3D medical imaging is used to create three dimensional visual representations of interior body parts for medical analysis with the help of computer-aided design (CAD) or a Magnetic Resonance Image (MRI).

The global 3D medical imaging market is further segmented based on type and geography.
By Type: Ultrasound; X-ray; CT Scan; Others
By End User: Diagnostic Centers; Hospitals; Research Centers
By Application: Gynecology and Obstetrics; Cardiology; Neurology; Orthopedics; Oncology
By Geography: The global 3D medical imaging market is segmented into North America, South

America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

Trends In The 3D Medical Imaging Market

3D medical imaging device manufacturers are increasingly investing in Artificial Intelligence (AI) to improve diagnoses by giving accurate, hard-number measurements. AI provides efficiency in medical imaging, particularly when it comes to detecting organs or anomalies.
3D Medical Imaging Global Market Report 2020 is one of a series of new reports from The Business Research Company that provides 3D medical imaging market overviews, analyzes and forecasts 3D medical imaging market size and growth for the global 3D medical imaging market, 3D medical imaging market share, 3D medical imaging market players, 3D medical imaging market size, 3D medical imaging market segments and geographies, 3D medical imaging market trends, 3D medical imaging market drivers and 3D medical imaging market restraints, 3D medical imaging market's leading competitors' revenues, profiles and market shares. The 3D medical imaging market report identifies top countries and segments for opportunities and strategies based on market trends and leading competitors' approaches.

Where To Learn More
Read 3D Medical Imaging Global Market Report 2020 from The Business Research Company for information on the following:
Markets Covered: Global 3D Medical Imaging Market
Data Segmentations: 3D Medical Imaging Market Size, Global And By Country; Historic And Forecast Size, And Growth Rates For The World, 7 Regions And 12 Countries
3D Medical Imaging Market Organizations Covered: GE Healthcare, Royal Philips, Siemens AG, The Esaote Group, Intrasense SA
Regions: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa
Time Series: Five years historic (2015-19) and forecast (2019-23)
Other Information And Analyses: PESTEL analysis, 3D medical imaging market customer information, 3D medical imaging market product/service analysis – product examples, 3D medical imaging market trends and opportunities, drivers and restraints, key mergers and acquisitions, key metrics covered: number of enterprises, number of employees, global 3D medical imaging market in 2020 - countries offering most new opportunities
Sourcing and Referencing: Data and analysis throughout the report are sourced using end notes.

Strategies For Participants In The 3D Medical Imaging Industry: The report explains a number of strategies for companies in the 3D medical imaging market, based on industry trends and company analysis.
Opportunities For Companies In The 3D Medical Imaging Sector: The report reveals where the

global 3D medical imaging industry will put on most $ sales up to 2023.

Interested to know more about The Business Research Company?

The Business Research Company has published over 1000 industry reports, covering over 2500 market segments and 60 geographies. The reports draw on 150,000 datasets, extensive secondary research, and exclusive insights from interviews with industry leaders. The reports are updated with a detailed analysis of the impact of COVID-19 on various markets. Here is a list of reports from The Business Research Company similar to the 3D Medical Imaging Global Market Report 2020:

Diagnostic Imaging Equipment Global Market Report 2020-30: COVID-19 Impact and Recovery

3D Printed Medical Devices Global Market Report 2020
