

Global Smart Dishwasher Market Forecast To 2023 By The Business Research Company

Smart Dishwasher Market Global Report 2020-30: Covid 19 Growth And Change

LONDON, GREATER LONDON, UK, June 4, 2020 /EINPresswire.com/ -- The global smart dishwasher market is expected to decline from \$6.7 billion in 2019 to \$6.6 billion in 2020 at a rate of -2.6%. The decline is mainly due to economic slowdown across countries owing to the COVID-19 outbreak and the measures to contain it. The market is then expected to recover and reach \$8 billion in 2023 at a rate of 6.9%. The increasing importance of kitchen renovation or remodeling is a key factor driving the growth of the smart dishwashers market. However, the high repair cost is a key factor hampering the growth of the market.

The smart dishwashers market consists of sales of smart dishwashers and related services that are used in commercial and household settings. A smart dishwasher is a linked smart home appliance (such as a smart microwave or smart oven) that gives your regular dishwasher enhanced features. Such features can include Wi-Fi access and options for versatility such as voice control from an activated virtual home assistant and mobile controls.
