PUNE, MAHARASTRA, INDIA, June 4, 2020 /EINPresswire.com/ -- [Voice-Directed Warehousing Solutions](#) enable warehouse holders to manage their distribution centers with the help of voice-directed systems. These systems support two processes, namely speech recognition and speech synthesis. The operator is provided a headset and a voice terminal, and is guided through each step by voice commands with the help of speech recognition technology. The speech synthesis technology enables the system to understand a user's response. Voice-directed systems guide through all the locations and help the staff pick orders accurately, thereby reducing errors and increasing labor productivity.

Revenue from the voice-directed warehousing solutions market in North America and Europe is expected to collectively account for over 42% of the global voice-directed warehousing solutions market revenue in 2018.
