

Global Hand Sanitizers Market Opportunities And Strategies

The Business Research Company's Hand Sanitizers Market Global Report 2020-30: Covid 19 Growth And Change

LONDON, GREATER LONDON, UK, June 10, 2020 /EINPresswire.com/ -- The global hand sanitizers market is expected to grow from \$1.52 billion in 2019 to \$3.04 billion in 2020. The markable growth is mainly due to the COVID-19 outbreak and the surge in the demand for hand sanitizers as a measure to contain it. The market is then expected to stabilize and reach \$3.34 billion in 2023 at a rate of 3.2%.

The COVID-19 outbreak coupled with growing concerns for hygiene is anticipated to escalate the demand for sanitizers during the year 2020 and in years to come ahead. However, health hazards associated with occupational exposure of chemicals used in sanitizers manufacturing are expected to limit the growth of the sanitizers market.

The hand sanitizer market consists of sales of sanitizers and their related services. Sanitizers are substances or liquid used for cleaning objects in order to get rid of harmful microorganisms, including bacteria, and are based on toxic chemicals such as iodine, chlorine, phenol, and quaternary ammonium compounds. These are products that combine disinfectant and detergent and are used to remove dirt, reduce or kill bacteria, and dissolve grease from surface to at least 99.9%. Sanitizers used in many places including airports, hotels & restaurants, hospitals, and other places for cleaning and protects against contamination.
