About FSC

Founded in 1941, Foundation for the Study of Cycles (cycles.org) is a fellowship of scholars, scientists and nonprofessional investigators who share a passion for better understanding cycles and how they can be used to make the world a better place. In addition to identifying thousands of verified natural, social and financial cycles, FSC published Cycles Magazine from 1950 to 1997, held conferences, published reports, funded research and developed software that revolutionized the study of cycles. An international nonprofit, the Foundation curates one of the world's most extensive collections of research and statistical data.
