

# SecZetta and SystemDomain Announce Partnership to Provide Third-Party Identity Risk to Finance and Healthcare Industries

*SecZetta and SystemDomain Announce Partnership to Provide Third-Party Identity Risk to the Financial Services, Healthcare, and Utilities Industries.*

CHICAGO, IL, USA, June 22, 2020

/EINPresswire.com/ -- [SecZetta](#), the leading provider of third-party identity management solutions, and [SystemDomain](#), a leading global information technology and consulting services company, today announced a

new implementation and reseller partnership. The partnership will add SecZetta's Third-Party Identity Risk solution to SystemDomain's end-to-end cybersecurity solutions portfolio.

Organizations in critical industries like Financial Services, Healthcare, and Utilities are under immense pressure to uphold the highest risk mitigation standards. This has become an even more daunting task for those that have adopted widespread use of third-party partners, vendors, and contractors to both cost-effectively expand their workforce as well as bring much needed skillsets onboard that may otherwise be in short supply. Because third parties are widely acknowledged by security professionals as high risk, special consideration needs to be taken when providing them with insider access to facilities, systems, and data. To be successful at mitigating the risk and improving the operational efficiency of managing the identity lifecycle and risk of these users, organizations need to automate best practices and ultimately redefine the lines between identity and risk management.

"As part of the partnership, SystemDomain will create a Center of Excellence with a dedicated focus on SecZetta's Third-Party Identity Risk solution," said Shubhi Garg, CEO, SystemDomain. "This commitment to excellence is the hallmark of SystemDomain and allows us to provide broad capabilities for solution Integration for a superior customer experience that is best able to address the onboarding, revalidation, and offboarding of third-party users for various IAM solutions."

“SecZetta’s Third-Party Identity Risk solution provides a comprehensive set of capabilities that help organizations improve the operational efficiency and reduce the cost and risk of managing third party identities,” said Jeremy Rohrs, VP of global alliances and business development, SecZetta. “Together with SystemDomain, we will be able to help organizations in critical industries like Financial Services, Healthcare, and Utilities protect and manage the digital identities of their third-party users with the same rigor as their full-time employees.”
