

PDFpen 12.1 Adds Page Label Support and More

Smile releases PDFpen and PDFpenPro 12.1 with page label support, and for Pro users, the ability to edit page labels.

SAN FRANCISCO, CALIFORNIA, CA, US, June 17, 2020 /EINPresswire.com/ -- Smile, the developer of productivity applications for Mac®, iPhone® and iPad®, has released PDFpen and PDFpenPro 12.1, an update to its all-purpose PDF editing tool for Mac. Version 12.1 adds page label support, and for Pro users, the ability to edit page labels.

Powerful PDF Editing on Your Mac

PDFpen 12.1 adds page label support for documents with multiple pagination formats. For example, a document's front matter may be numbered with lowercase Roman numerals (i.e. i, ii, iii...) followed by the body matter with Arabic numerals (i.e. 1, 2, 3...). Version 12.1 handles this with a consistent viewing and navigation experience that matches the document page numbering.

PDFpenPro 12.1 users can modify page label entries, ensuring page numbers displayed on thumbnails are identical to the actual page numbering in a document.

"Users want to view, navigate, and edit PDFs easily," said Philip Goward, Smile founder. "Version 12.1 now supports displaying page labels added to documents. Plus, Pro users can go a step farther with the ability to add or edit page labels, an important feature for our professional customers."

PDFpen and PDFpenPro 12 work with PDFpen for iPad & iPhone, allowing seamless editing across devices when used with Dropbox or iCloud.

PDFpen and PDFpenPro 12 require macOS 10.13 (High Sierra) or later. For macOS 10.12 (Sierra) or earlier, see our website for compatible PDFpen versions. Demo versions are available on our site. Full versions of PDFpen and PDFpenPro are available for purchase on Apple's Mac App

Store. PDFpen is also available via subscription from Setapp.

New in PDFpen 12.1:

- Displays page labels
- Edit page labels (PDFpenPro only)
- Various fixes and improvements

Features Specific to PDFpenPro:

- Export to Microsoft® Excel (.xlsx), Microsoft® PowerPoint (.pptx) and PDF Archive (PDF/A) formats (requires Internet connection for .pptx and PDF/A, must be a licensed user)
- Create cross-platform fillable PDF forms including interactive signature fields and email or web submission buttons
- Create and edit Table of Contents
- Convert websites into PDFs
- OCR multiple documents in batch
- Add and edit document permissions
- Automatic form creation makes existing PDF forms fillable
- Gather submitted form data via backend integration
- Add and delete file attachments and annotations
- Create Portfolio documents, combining related files
- Correct typos in OCR text layer
- OCR horizontal Chinese, Japanese & Korean
- DocuSign® support

Features:

- Add text, images and signatures to PDFs
- Correct text in original PDF with editable text blocks
- Fill out interactive PDF forms and sign them
- Redact or erase text
- Search and replace, search and redact, and search and highlight text
- Export in Microsoft® Word format, TIFF, JPEG, PNG, and flat PDF
- Scan directly from Image Capture and Mac compatible scanners
- Perform OCR (Optical Character Recognition) on scanned documents
- View OCR layer for proofing OCR text from scans, or remove OCR layer
- Edit original images, including adjusting resolution, color depth and contrast, skew, and size of an image or scanned document
- Sign PDF forms via drawing, interactive signature fields, or AATL or self-signed certificates
- Insert and remove pages; reorder pages in a PDF with drag & drop; combine PDFs maintaining Table of Contents entries
- Move, resize, copy and delete images in original PDF
- Save PDFs directly to Evernote
- Preview and extract file attachments and annotations
- Record and playback audio annotations

- Copy and paste rich text; retain fonts and formatting when copying from PDFs
- Context-sensitive popup-menus enable quick edits
- Add notes and comments, print annotation summary with or without the original text
- Mark up documents with highlighting, underscoring and strikethrough
- Save frequently-used images, signatures, objects and text in the Library; sync Library items with PDFpen for iPad & iPhone
- Add page numbers, bookmarks, headers and footers, line numbers and watermarks
- Apply business-related and Sign Here stamps
- Password protect a document with up to 256-bit AES encryption
- Compress PDF documents for smaller file sizes
- Automate PDF manipulations with AppleScript and JavaScript
- Available in English, Japanese, German, French, Italian, and Spanish
