

Swan Island Networks announces RISE: Recovery Information Sharing Exchange to conquer mountains of recovery information

RISE, a free community for qualifying businesses, will facilitate easy access to vetted information on the ever-evolving recovery from COVID-19.

PORTLAND, OR, UNITED STATES, June 22, 2020 /EINPresswire.com/ -- [Swan Island Networks](#) has released RISE, an information sharing exchange to help corporations navigate the expanding glut of conflicting news, regulations, best practices and innovations surrounding the economic recovery from COVID-19. The RISE solution is free to qualifying corporations worldwide.

“Our customers and their peers are overloaded with constantly changing information about reopening the economy in the United States and globally,” said Pete O’Dell, CEO of Swan Island Networks. “By working together and aligning efforts, companies can improve their awareness without compromising proprietary information.”

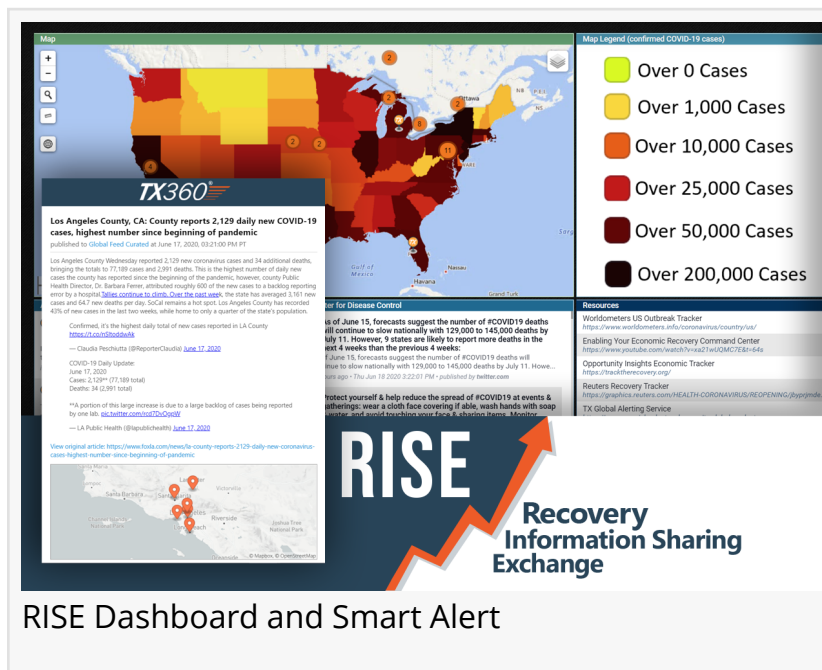

“

Good intel and targeted sharing efforts can save an organization huge amounts of time and provide better information as opposed to uncoordinated browsing by many people several times a day.”

Pete O'Dell

Powered by Swan Island’s proven [TX360](#) SaaS platform for intelligence analysis and curation, the exchange will feature continually updating dashboards and shareable Smart Alert notifications delivered by email and text, as well as participant-enabled submissions and feedback. This service operates in the Microsoft Azure cloud, giving distributed capabilities for those working at home or collaborating across continents.

“Good intel and targeted sharing efforts can save an

organization huge amounts of time and provide better information as opposed to uncoordinated browsing by many people several times a day," O'Dell said. "We vet sources, curate important alerts with geospatial context, and present an array of dashboards—each of which focuses on a particular aspect of the crisis including testing, recurrence, employees, supply chain, and federal, state and legal coverage. We also encourage participants to submit excellent content, making everyone more informed and better able to execute toward a new normal." An extensive set of Economic Recovery dashboards and globally-curated alert feeds including U.S. and global virus recurrence tracking, U.S. and international travel issues, trends in U.S. and world markets, supply chain issues, regulations news, and validated best practices is included with membership.
