

Global Organic Farming Market Segments, Drivers, Trends, 2020-2030

Organic Farming Market Global Report 2020-30: Covid 19 Growth And Change

LONDON, GREATER LONDON, UK, June 23, 2020 /EINPresswire.com/ -- The global organic farming market is expected to grow from \$88.8 billion in 2019 to \$95.9 billion in 2020 at a rate of 8%. The growth is stable across many countries due to the COVID-19 outbreak and the extending lockdown as a measure to contain it, however, strong growth is registered in USA even during the lockdown. The market is then expected to reach \$131.55 billion in 2023 at CAGR of 11.11%. The environmental benefits of organic farming coupled with health benefits of organic products is increasing the demand for organic food, which in turn is driving the market for organic farming. However, less productivity of organic food is expected to hinder the organic farming market.

Organic farming is an alternative form of farming for crops and livestock's produce which doesn't use pesticides, artificial fertilizers, genetically modified organisms, and antibiotics to increase the production. This has many benefits to the environment and the individuals using these yields.
