Market Dynamics

As the population increases and gets inside the workforce, the purchasing power also increases. Thus, the demand for industry products is expected to continue growing. Consequently, the revenue of the industry has increased at an average rate over the five years. Online shopping acts as a direct threat to common industry retailers. These online retailers can offer the same products as offered by main retailers, but with lower prices, more extensive lists and the facility of direct home shipping. Thus, the increase in the percentage of services carried online will

decrease the demand for traditional stores, which results in a decrease in industry revenue. The percentage of online services is expected to rise in 2020, which represents a potential threat to the industry.
