

David Bellman and Jillian Bridgette Discuss Big Ideas That Might Change The World with Fotis Georgiadis

David Bellman, founder and owner of Bellman's. Jillian Bridgette, CEO & Co-founder of Virtual Health Partners, Inc.

GREENWICH, CT, USA, June 25, 2020 /EINPresswire.com/ -- Fotis Georgiadis, owner of the blog by his namesake, is a branding and image consultant specialist with a robust background and is a visionary interviewer. With a knack for pulling out a well-rounded interview, not only covering cutting edge technologies and corporate directions but also bringing out the personal side of the interviewee.

David Bellman, founder and owner of Bellman's

Changing the world for the better should be everyone's goal. David Bellman and Jillian Bridgette discuss their ideas and business that could very well change it for many people. Fotis Georgiadis' interview, along with his brand and image specialty is helping get the word out while also creating a 'trust' factor these clients. Reach out to him at the below contact options to get your brand/image back on the right track, attracting new long term clients.

“

Our research shows that just after 2 weeks, enough dirt, grime and bacteria builds up to levels that are considered dangerous.”

Can you tell us about your “Big Idea That Might Change The World”?

My big idea was the discovery of harnessing the cleaning power of your home dishwasher, to clean and sanitize your jewelry. The dishwasher has all of the same elements that professional jewelers use when cleaning jewelry—steam, hot water and soap. In essence, the GemSpa gives the user the ability to turn their \$1000 dishwasher into a \$1000 professional jewelry cleaner.

We designed a device that would hold jewelry safely while the cleaning elements of the dishwasher clean and sanitize fine jewelry with professional results. From the high grade polymer plastic to the patented design of the stainless steel diffusers, every design detail enhances the cleaning ability of the dishwasher. This also includes the addition of our anti-bacterial gel that boosts the sanitization level to 99.9% of all bacteria and viruses.

In addition, the GemSpa by Kathy Ireland, is simple and easy to use and requires only 3 minutes of your time. Unlike most jewelry cleaners that require setup time and rely on a watered down cleaning solution and a vibrating tank, GemSpa cleans your jewelry with your dishes. Simply remove your jewelry and place it in the GemSpa, add a small amount of antibacterial gel, and place the GemSpa on the top rack of your dishwasher. When the cycle is complete your jewelry is professionally cleaned, sanitized and ready to wear.

Jillian Bridgette, CEO & Co-founder of Virtual Health Partners, Inc.

How do you think this will change the world?

Currently, 95% of the population is wearing some type of jewelry and are unknowingly carrying around with them jewelry contaminated with bacteria and viruses. Here's an alarming statistic—in the US alone, 1 in 6 Americans contract food poisoning every year. That's nearly 50 million people. We know jewelry carries extremely high bacteria loads and touches the food we prepare and eat. By sanitizing jewelry, I believe we could reduce this number significantly. Can you tell us about your “Big Idea That Might Change The World”?

Virtual Health Partners (VHP) is redefining virtual healthcare offering by providing condition-specific live support for nutrition, lifestyle and fitness support. Offered exclusively through our network of partners including insurers and self-insured companies, hospital systems, and health product companies including fitness clubs, VHP's Business-to Business-to-Consumer (B2B2C) model provides a SaaS and PaaS solution that fully customizable and scalable. Through the privacy compliant, HIPAA compliant platform, VHP provides its partners with a turnkey solution

for clients in the areas of weight loss and weight loss procedures, metabolic syndrome, oncology, women's health, digestive diseases, cardiac rehab, preventive medicine, plastic surgery and general wellness

The company is now on the forefront of virtual care and uniquely positioned to address the rising demand and challenges that Americans and people across the globe face during and post the coronavirus pandemic, as social distancing is not just going to go away quickly.

Now more than ever being able to provide a fully customized and personalized virtual solution is imperative. Our virtual, live wellness program creates a sense of community using an approach that incorporates small virtual group support led by nutritionists, health coaches, psychologists and social workers, to make clients feel less alone and also to keep them on track with their health goals while working with health experts in person is not an option in our new post COVID-19 world.

How do you think this will change the world?

While many companies are rushing to build interactive online experiences from scratch, something that is both expensive and time consuming, VHP Business Partners benefit from a turnkey, built and proven platform, that is also fully customizable. The VHP team brings a breadth of knowledge that delivers immediate connections and meaningful experiences.

Even after the COVID-19 threat has diminished, it's unlikely that fitness centers and physician's offices will be able to operate at full capacity for some time — if ever again.

With gym and medical office closures nation-wide, patients can find the content they need to stay on track pre or post surgery on the VHP platform. VHP provides personalized tools which guide patients to eat a healthier, more nutritious diet, while helping manage specific conditions and their symptoms. VHP also provides fitness and lifestyle content to support healthy behaviors, ideal for someone post-op.

VHP helps physicians provide after-care support to patients who are not able to make it into the office and also gives gyms a way to extend services to members who feel safer working out from home or who just can't fit into the likely now limited class capacity. It truly is the way of the future for many healthcare and fitness providers to connect with and support patients/members in this new world. Read [the rest of the interview here](#).
