Overview

According to this study, over the next five years the Biogas Plants market will register a 7.2% CAGR in terms of revenue, the global market size will reach \$ 5404.7 million by 2025, from \$ 4099 million in 2019. In particular, this report presents the global revenue market share of key companies in Biogas Plants business, shared in Chapter 3.

Using renewable sources, such as biogas, can help reduce the increasing carbon footprint, and thereby reduce the average rate of the increasing temperature of the world. Biogas plants can be utilized to generate heat, electricity, and biofuel. Moreover, biogas plants can also help provide food security, protect water bodies, improve air quality, manage waste, and increase employment opportunities. The biogas plants market is primarily driven by the growing focus on alternative fuels as means to achieve an imperishable form of energy and security. Nevertheless, the biogas plant market can be obstructed by high primary investment and setting up costs.

With the potential to reduce greenhouse emission by 10-13% from the current level, the biogas plant market is expected to grow significantly during the forecast period.

Among the types of biogas plants, micro digesters have been used for several centuries and have the maximum number of plants around the world. Although elementary production of biogas had been initiated 3000 years ago, the modern application of biogas started in the 17th century.

Europe is the largest biogas market, with an estimated biogas production of nearly 700 petajoules (PJ). The region has around 17,500 scale digesters that have an installed capacity of 10GW.

This report presents a comprehensive overview, market shares and growth opportunities of Biogas Plants market by type, application, key companies and key regions.

This study considers the Biogas Plants value generated from the sales of the following segments:

Segmentation by type: breakdown data from 2015 to 2020 in Section 2.3; and forecast to 2025 in section 10.7.
