

Rhode Island US Navy Veterans Lung Cancer Advocate Now Offers a Navy Veteran with Lung Cancer in Rhode Island Who Had Asbestos Exposure in the Navy to Call the Lawyers at Karst von Oiste-Compensation Might top \$100,000

PROVIDENCE, RHODE ISLAND, USA, August 19, 2020 /EINPresswire.com/ -- The Rhode Island US Navy Veterans Lung Cancer Advocate is offering a Navy Veteran who now has lung cancer and who decades ago was exposed to asbestos in the navy direct access to the lawyers at the law firm of Karst von Oiste. Financial compensation for a Navy Veteran who now has lung cancer and who had significant exposure to asbestos could be more than \$100,000. The typical Navy Veteran the Advocate is trying to identify is over 60 years old and their asbestos exposure occurred prior to 1982. It does not matter if they smoked cigarettes. Most people like this never get compensated because they are unaware the \$30 billion dollar-asbestos trust funds were set up for them too. "If this sounds like you or your loved one-please call the amazing attorneys at the law firm of Karst von Oiste at 800-714-0303-to discuss compensation."

The Advocate says, "We are urging the family members of a Navy Veteran who now has lung cancer and who had heavy exposure to asbestos decades ago to please call the lawyers at the law firm of Karst von Oiste at 800-714-0303. We want to emphasize this is not a lawsuit against the navy. The financial claims involve companies that provided asbestos containing parts, equipment or insulation that went on ships and submarines. As mentioned, the compensation for a Navy Veteran like this might be significant. This is worth your time. Please call Karst von Oiste if this sounds like you or your loved one." www.karstvonoiste.com/

High-risk work groups for exposure to asbestos in Rhode Island include US Navy Veterans, civilian employees at Naval Station Newport, power plant workers, shipyard workers, maritime workers, oil refinery workers, industrial

workers, public utility workers, plumbers, electricians, auto mechanics, machinists, welders, insulators, or construction workers. Typically, the exposure to asbestos occurred in the 1950's, 1960's, 1970's, or 1980's. www.karstvonoiste.com/

According to the American Cancer Society for nonsmokers who have been exposed to asbestos in their workplace the risk of lung cancer is five times that of unexposed workers.

The US Navy Veterans Lung Cancer Advocate says, "If your husband, dad, coworker or neighbor has just been diagnosed with lung cancer and you know they had significant exposure to asbestos in the navy, at a shipyard or while working at a factory, at power plant, public utility, or as a plumber, electrician welder, mechanic or any kind of skilled trades group in any state please have them call us anytime at 800-714-0303. Most people like this never get compensated-even though the asbestos trust funds were set up for them too. We are trying to change this sad fact."
