

MxHero's New Plugin Integrating MS Outlook & Egnyte Now Available From The Outlook App Store

MxHero's new feature-rich plugin for MS Outlook and Egnyte cloud content

management integration, is now available for installation directly from within Outlook

SAN FRANCISCO, CA, UNITED STATES, July 7, 2020 /EINPresswire.com/ -- [MxHero](#) announces

The ability to better manage, secure, and collaborate with email content through Egnyte is game-changing for many organizations."

Alex Panagides, CEO, mxHero Inc.

today general availability of its powerful integration between Microsoft's Outlook email client and the [Egnyte](#) content platform directly from the Microsoft Outlook AppSource store. The add-in can be installed directly from within Outlook for Windows, Mac, and OWA (Outlook Web Access).

Once installed, users will be able to navigate Egnyte folders and files directly from within the Outlook interface. Additional capabilities include download, preview, collaboration, move and deletion of files, folders, and email

messages. When saving emails to Egnyte, MxHero optimizes email content for the Egnyte environment by automatically saving the email message as a text-searchable PDF document linked to any attachments that are saved separately. Furthermore, MxHero automatically sets Egnyte metadata fields like email sender, subject, message date. The metadata fields ensure rapid and meaningful search of saved messages. For example, all emails from a specific sender can be discovered within Egnyte or directly from the plugin's search interface. In addition, the plugin supports custom metadata fields that can be edited upon upload to allow for company-specific information like client or matter numbers.

"We are super excited to be deployed to Microsoft's AppSource store. The add-in store enables self-service of one of mxHero's most powerful offerings. The ability to better manage, secure, and collaborate with email content through Egnyte is game-changing for many organizations. The Egnyte platform serves as a single, secure repository for all content whether documents or email correspondence," says Alex Panagides, CEO of mxHero Inc.

The plugin requires Outlook 2013, Outlook 2016, Outlook.com, or Office 365 with an email that is

hosted on a Microsoft Exchange server.

About mxHERO

MxHero's products and services give companies, service providers, and end users powerful new ways to control, use, and analyze email-based content. Apps developed for MxHero's platform work with any email management program, including Office 365, Gmail, and Microsoft Exchange.
