

Milrem Robotics to discuss Vehicle Developments for Future Armoured Vehicles CEE 2020

Smi reports: Milrem Robotics will provide detailed discussions on Vehicle Developments for the Future Armoured Vehicles Central and Eastern Europe conference

LONDON, ENGLAND, UNITED KINGDOM, July 13, 2020 /EINPresswire.com/ -- The Future Armoured Vehicles Central and Eastern Europe Conference will return to Prague, Czech Republic on Monday 13th and Tuesday 14th October 2020. With the conference now in its 6th year, [Milrem Robotics](#) will be in attendance as a sponsor and exhibitor for the highly anticipated event.

Interested parties that register until the 28th August can [save £200](#) with the Early Bird rate: <http://www.futurearmouredvehicles.com/pr9ein>

With unmanned capabilities continuing to grow as a vital requirement for future armoured systems, Milrem Robotics has recently designed and launched the 'Type-X' used to bolster and support the combat capability of mechanized units. "The main functions of unmanned fighting machines are to secure convoys and protect the perimeters or bases. The Type-X, armed with CPWS, can be positioned either in front of and behind a convoy, giving the unit additional observation and firepower.

With a rapidly developing market and a growing strategic importance in the region, this two-day event will provide attendees the perfect platform to exhibit and explore advancing technologies with those shaping next generation capabilities.

SMi Group are proud to have Milrem Robotics as a sponsor for this year's event, where they will be providing a technical presentation on the armoured vehicle platforms, systems and updates available to allied nations in the Central and Eastern European region and beyond.

Established in 2013, Milrem Robotics has established itself as one of the market leading companies in the field of unmanned armoured systems, chiefly with regards to the THeMIS unmanned ground vehicles. This unmanned system is a multi-mission platform that can be used for a wide variety of defence applications including transportation, surveillance and reconnaissance, force multiplier etc.

2020's conference will also feature presentations from leading regional nations such as Austria, Czech Republic, Estonia, Slovenia, Poland, Romania
