

Global Service Integration and Management (SIAM) Market 2020 COVID-19 Impact, Analysis and Forecast 2027

WiseGuyReports.com adds "Global Service Integration and Management (SIAM) Market Research Report 2020 Analysis and Forecast 2027" reports to its database.

PUNE, MAHARASTRA, INDIA, July 13, 2020 /EINPresswire.com/ -- Service Integration and Management (SIAM) Market:

Executive Summary

Service integration and Management enables managing various suppliers of service providers and integrating them together in order to provide a single business faced IT organization. The cost efficiency and service providence through this integration are the key drivers for the market growth of a market. Convenience and ease of operations are delivered as customer has to communicate with a single point of contact i.e. a single company at the frontend to tackle operations and problems related to it while various companies and service providers integrate at backend. Due to growing digitization, many companies have adopted online platform to provide the IT services which gives rise to the options available for the customer to choose service provider. As per Statista is April 2020, global online penetration rate is 59% of the world population motivating digital advertisements and enhancing the growth of the market. With integration of services, topnotch services of various companies could be provided to a single client which enhances its adaptation and ensures value proposition. With the help of this model, innovative technologies could be inhibited, proper use of skills and resources are benefitted whereas reduction in the process cost is incurred which enhances the uses of service integration. Mergers and acquisition strategies adopted by key players in the market in order to expand the reach and gain a larger market share. For Instance: Accenture PLC in May 2018 acquired UK based Certus Solution to strengthen the delivery on Oracle cloud based operations. Also, in December 2017, Siemens, a German equipment maker collaborated with HCL India in order to expand the IoT platforms and developed advanced tools and techniques to create a differentiation among existing products. However, lack of willingness among the service providers to support the process of integration is a major restraining factor which impedes the growth of the market over the forecast period of 2020-2027.
