

Alabama US Navy Veterans Lung Cancer Advocate Offers the Family of a Navy Veteran in Alabama Who Has Lung Cancer and Who Had Exposure to Asbestos Decades Ago to Call the Lawyers at Karst von Oiste About Compensation

MONTGOMERY , ALABAMA, USA,
September 11, 2020 /

EINPresswire.com/ -- According to the Alabama US Navy Veterans Lung Cancer Advocate, "We want a Navy Veteran with lung cancer in Alabama to get the best possible compensation-if during their service in the navy they had significant exposure to asbestos. Financial compensation for a person like this might exceed \$100,000 and the compensation claim does not involve suing the navy. The typical person we are trying to identify is over 60 years old-and it for this reason we need their wife, or adult son-daughter to help to get them identified. To assist a Navy Veteran like this-or their family we have endorsed the lawyers at the law firm of Karst von Oiste. For direct access to the lawyers at the law firm of Karst von Oiste please call 800-714-0303 anytime. This is worth your time." www.karstvonoiste.com/

The lawyers at the law firm of Karst von Oiste have been assisting Navy Veterans and people with asbestos exposure lung cancer and mesothelioma for decades and they are responsible for

over a billion dollars in compensation for people like this. Most Navy Veterans who develop lung cancer-and who were exposed to asbestos in the navy prior to 1982 are not aware the \$30 billion dollar-asbestos trust funds were set up for them too. For direct access to the lawyers at the law firm of Karst von Oiste please call 800-714-0303 anytime.

High-risk work groups for exposure to asbestos in Alabama include US Navy Veterans, workers at Maxwell Air Force Base or Fort Rucker, workers at one of Alabama's 8 power plants, shipyard workers, oil refinery workers, steel mill workers, pulp and paper mill workers, manufacturing workers, industrial workers, public utility workers, plumbers, electricians, auto mechanics, machinists, or miners. Typically, the exposure to asbestos occurred in the 1950's, 1960's, 1970's, or 1980's. www.karstvonoiste.com/

According to the American Cancer Society for nonsmokers who have been exposed to asbestos in their workplace the risk of lung cancer is five times that of unexposed workers.

<https://www.cdc.gov/cancer/lung/statistics/index.htm>.

The US Navy Veterans Lung Cancer Advocate says, "If your husband, dad, coworker or neighbor has just been diagnosed with lung cancer and you know they had significant exposure to asbestos in the navy, at a shipyard or while working at a factory, at power plant, public utility, or as a plumber, electrician welder, mechanic or any kind of skilled trades group in any state please have them call us anytime at 800-714-0303. Most people like this never get compensated-even

though the asbestos trust funds were set up for them too. We are trying to change this sad fact.”

<https://USNavyLungCancer.Com>

States with the highest incidence of lung cancer include Kentucky, West Virginia, Maine, Tennessee, Mississippi, Ohio, Indiana, Louisiana, Arkansas, Missouri, North Carolina, Rhode Island, Alabama, and Delaware.
