

KWizCom Announces a Webinar on Creating Expense Reporting & Approval Solution Without Becoming a SharePoint Forms Expert

KWizCom will be hosting a new webinar this time on creating expense reporting and approval solution for web and mobile without requiring technical skills

TORONTO, ONTARIO, CANADA, July 28, 2020 /EINPresswire.com/ -- KWizCom, a leading developer of SharePoint Forms & Workflows, as well as multiple other top-notch SharePoint web parts, add-ons and apps for Microsoft 365 announced they will be airing a new webinar entitled "Create Expense Reporting & Approval Solution Without Becoming a Forms". The webinar will be led by SharePoint expert and consultant from the UK Peter Baddeley.

Expense reporting scenario is a classic example of a solution that requires multi-row forms along with other dynamic forms capabilities and workflows. Unlike many technical form and workflow tools, with KWizCom Forms users can implement such SharePoint forms without any complex "forms-designer" experience, by simply setting up rules using KWizCom Forms web settings pages.

In this live session SharePoint Expert and Consultant Peter Baddeley will demonstrate how non-technical users can easily create expense reporting and approval solutions by using KWizCom's modern forms.

The example solution will include:

- Multi-row form that allows quick & convenient expense reporting
- Advanced validation rules that ensure only valid expenses are reported
- Dynamic form behaviour (show, hide or disable fields according to user input, cascading fields and more)
- Ability to attach files to each expense row (scanned receipt for example)
- One design for web & mobile devices
- Easily configured workflows that send notifications to the appropriate approvers and update other systems once expense is approved
- Clear dashboard showing users their reports according to status (pending, approved, etc.)

The webinar will air live on Wednesday, August 12th at 2pm EST. The webinar recording will be available on demand within one or two business days.

"I am excited to be presenting again with KWizCom. Expenses management in SharePoint is always a challenge, but KWizCom forms gives you the flexibility to quickly build a solution without technical skills", says Peter Baddeley.
