

GrowthCell Global Discovers 2-AG Endocannabinoid is Naturally Occurring in its Uptake Technology

Award-Winning CBD Innovation Experts Announce Revolutionary New Naturally Occurring 2-AG Endocannabinoid in its Uptake Technology

ALBERTA, CANADA, July 28, 2020 /EINPresswire.com/ -- [GrowthCell™ Global Corp.](https://www.growthcell.com) is announcing new findings surrounding its coveted cannabinoid enhancing technology.

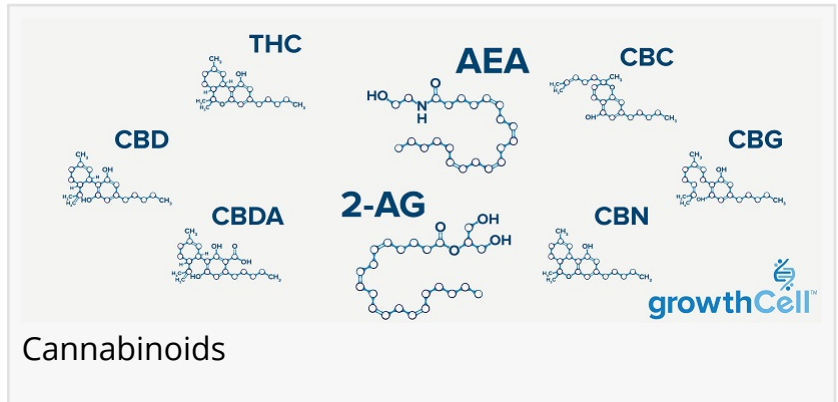

GrowthCell's Amino Acid Complex has long been known to elevate CBD absorption by up to 139% while increasing the efficiency of endocannabinoid signalling. However, a groundbreaking discovery about its ingredient composition is about to change cannabinoid consumption around the world.

Complete coverage of this revolutionary discovery, contained within the following article entitled "AEA and 2-AG Discovered in CBD Enhancing Amino Acid Complex," can be found here on [LinkedIn](#).

Cannabidiol, an organic compound derived from cannabis and hemp, has become incredibly popular throughout the world. CBD's global market value reached \$4.6 billion (USD) in 2018 and this figure is projected to grow astronomically in the years to come. It is estimated that CBD's value will continue to expand at a compounding annual growth rate of 22.2% from 2020 to 2025.

Despite the wide-spread popularity of these products, isolated CBD is not received well by the body. The standard oil-based tinctures on the market, while capable of marginally boosting CBD absorption, are sub-optimal choices for cannabinoid delivery. In contrast, GrowthCell's Amino Acid Complex dramatically enhances the bioavailability of cannabidiol while delivering crucial endogenous cannabinoid compounds that can't be found anywhere else.

A new analysis, performed by Sante Laboratories (Austin, Texas) in May 2020, discovered that GrowthCell™'s Amino Acid Complex delivers two potent endocannabinoids that are produced by

our own cells. These natural compounds are known as AEA (Anandamide) and 2-AG (2-Arachidonoylglycerol). GrowthCell's complex is the first product on the market known to provide these potent endogenous cannabinoids and it is the only ingredient that can increase 2-AG concentrations in the body. The balance of these two compounds help to bring unparalleled harmony and efficiency to our internal Endocannabinoid System (ECS) along with other vital physical and neurological systems.

"CBD is well known for its ability to boost the body's production of AEA. GrowthCell's Amino Acid Complex enhances all cannabinoids while directly delivering 2-AG and AEA to the body. When this composition is taken with CBD, the combination results in a significant boost to our body's AEA and 2-AG levels, an effect which cannot be accomplished by any other natural cannabinoid, or CBD delivery technology," says Vernon Parkhurst, Co-Founder and Managing Consultant & Visionary.

This [patented technology](#) allows consumers to maximize their CBD use while providing complete holistic care in a way that was not possible until now. The properties of this product, including the unique delivery of 2-AG and the total synergy between CBD, AEA, 2-AG, and GrowthCell's Amino Acid Complex, are poised to revolutionize the CBD craze. Human studies have placed the CBD enhancing properties of GrowthCell's Amino Acid Complex in a tier of its own and this groundbreaking discovery will usher in a new era for the global cannabis industry.

Empower your cannabinoid, including CBD, formulas with GrowthCell's uptake technology. Reach out TODAY and discover how we can take your cannabinoid business to the next level. For further information, please call 1-833-759-4808.

About GrowthCell™ Global Corp.

GrowthCell Global Corp. has the exclusive rights to manufacture, distribute, market, and sell its groundbreaking amino acid complex worldwide, including its sale in combination with any other ingredient. It specializes in the nutraceutical supplement industry and is one of the most important bio-available additives in the industry for people and pets. The complex consists of 22 amino acids, cationic peptides, growth factors, miRNAs, embryonic peptides derived from fertilized hen eggs. The incredible synergy between this vital amino acid complex and cannabidiol was recognized at the World CBD Awards (Barcelona, Spain), where GrowthCell Global Corp. was granted the 2019 CBD Innovation Award. Enhance. Stimulate. Rejuvenate.
