WiseGuyReports.com Publish A New Market Research Report on –“ Global Cryptocurrency and Blockchain Industry Report 2025 | Business Risk & Opportunities”.

Summary: -

Crypto-currency is a digital currency that utilizes cryptography techniques to make the transactions secure and to limit the creation of additional units of currency. Crypto-currency is decentralized and there is no third-party/central body/governing body involved in producing new currency, verifying transactions, and protecting the currency supply. The blockchain acts as a ledger that shows the transaction activities between the peers. Crypto-currency is a future and new revenue stream in the digital finance world. Furthermore, crypto-currency is not bound by any rules or regulations of any specific government or exchange rates, interest rates, and country to country transaction fee, which makes international transactions faster. The prime drivers of the crypto-currency market include proper security, authentication, ease of transactions and “push mechanism” that allows the crypto-currency holder to send exactly what he wants without any further information. Globally, more than 70% of the mobile phone users prefer transactions over their phones, which is one of the major drivers for the market growth.
