

Use Of Polymer Beads As Cleaning Agents In The Soap And Cleaning Compounds Market Is Gaining Traction

The Business Research Company's Soap And Cleaning Compounds Global Market Report 2020-30: Covid 19 Impact And Recovery

LONDON, GREATER LONDON, UK, August 7, 2020 /EINPresswire.com/ -- Polymer beads are being used as cleaning agents in the soap and cleaning compounds market, to reduce water and energy consumption. Tiny, spheroidal plastic chips beads absorb stains, stray dye, and soil, carrying them away from fabrics, resulting in a cleaning process that uses less water and chemicals than traditional commercial washing machines. It also washes fabrics at lower temperatures, thereby conserving energy. For example, Xeros developed near-waterless polymer bead cleaning technology for the dry cleaning, hospitality and industrial industries.

Global Soap And Cleaning Compounds Market, Forecast Market Size, 2019 – 2023, \$ Billion
