industrial workers, plumbers, pipefitters, electricians, mechanics, machinists, miners, railroad workers and construction workers, to name a few. Since the latency period for mesothelioma patients is approximately 40 years, most people diagnosed with mesothelioma or asbestos-related lung cancer in 2020 were exposed decades ago.

Exposure to asbestos in New York has been brought to the forefront in the aftermath of the September 11th attacks, but asbestos has been a problem in New York for decades. One of the first companies to popularize asbestos, the H.W. Johns Manufacturing Company (now Johns Manville), was founded in New York City in 1958. Since then, tons of asbestos have been used in a number of industries throughout the state.
