PUNE, MAHARASHTRA, INDIA, August 14, 2020 /EINPresswire.com/ -- Updated Research Report of [Electric Car Motor Market 2020-2026](#):

Summary:

Wiseguyreports.Com Adds "Electric Car Motor - Market Demand, Growth, Opportunities, Manufacturers and Analysis of Top Key Players to 2026" To Its Research Database.

Overview

The electric motor facilitates the conversion of electrical energy into mechanical energy for propulsion of the vehicle, with the objective to enable regenerative braking or charging energies to generate electricity stored on board.

The major factor driving the growth of the electric vehicle motor is the increase in demand for improving the driving range of electric vehicles, which in turn has a positive impact on the growth of the market over the forecast period. The range of the electric vehicle is majorly dependent on the electric powertrain control systems. Another major driver for the growth of the market is the introduction of stringent government regulations. Globally, many countries have implemented stringent emission norms for lowering GHG emissions for reducing the causes of global warming. Therefore, it mandates the automotive manufactures to develop zero emission vehicles for meeting the more stringent emission standards. These regulations have led to an increased focus on production of more efficient electric vehicles, thereby driving the market growth during the forecast period. The other factors driving the growth of the market are introduction of tax incentives, and subsidies for EV manufacturers and end-users.

The global electric vehicle motor market has seen a remarkable growth in the global market and it has been observed that, its demand in future is expected to grow with the CAGR of ~20%.
