[Medical Smart Textile Market 2020](#)

Summary: -

Medical smart textile is a new field of research and is the most widely used healthcare sector. Sensors are embedded in the textiles, in constant contact with the human body, and could intercept the physiological modifications within the body. The demand for medical smart textiles is increasing due to the rising burden of diseases, evolving methods of diagnosis, and the widespread use of wearable medical devices. These factors are anticipated to stimulate the growth of the global medical smart textile market. Though, the high cost of smart textiles is anticipated to hinder market growth. The Global Medical Smart Textile Market is forecast to register a CAGR of 7.51% to reach 2,105.32 Million by the year 2027. During the forecast period, the increasing burden of diseases is projected to feed the growth of the global medical smart textile market. As per the Global Burden of Disease Study in the year 2017, from 1990 to 2017, the major causes of premature deaths were neonatal disorders, ischemic heart disease, lower respiratory infections, diarrhoea, chronic obstructive pulmonary disease (COPD), and strokes. These diseases represent more than 1 million deaths worldwide in the year 2017. Moreover, the Global Burden of Disease Study in 2017, stated that there was a change in the mortality rate due to excess drug-resistant tuberculosis from the year 2007 to 2017.
