

# SmartKlinik, a Bangalore Based Ingenious TeleHealth Company expands into Africa with Orange HealthCare in Ghana

*With the onset of the pandemic, telehealth has gone mainstream & Orange healthcare realized that The "Time Is Now" & partnered with Bangalore based SmartKlinik.*

BANGALORE, INDIA, August 19, 2020 /EINPresswire.com/ -- [SmartKlinik](https://www.smartklinik.com) the telehealth and virtual medical consultation platform is launching across Ghana in partnership with Orange Healthcare.

Telehealth in Ghana is driven by foundations such as Novartis and others primarily focusing on supporting populations in rural and remote parts of the country.

With the onset of this pandemic, telehealth has gone mainstream and is no longer a nice-to-have service, rather a must-have. Orange healthcare have realized that "The Time Is Now" and partnered with Bangalore based SmartKlinik to launch the platform for everyone to use it and be safe during these most unprecedented times we are living in.

"Telehealth is bridging the gap between people, physicians and health systems, enabling everyone, especially symptomatic patients, to stay at home and communicate with physicians through virtual channels, helping to reduce the spread of the virus to mass populations and the medical staff on the frontlines," said Dr. Abhijith Shetty, Chief Product Officer at SmartKlinik

Christopher Rockson, CEO Orange Healthcare stressed that choosing the right partner was critical in a time when so many telehealth platforms are available but the easiest decision for him was when he learnt that Smart Klinik is not just created by a bunch of techies but also had medical doctors sitting together to map out the pain points of the industry which makes this

SmartKlinik Logo

platform extremely functional for both Doctor and Patient.

Some of the SmartKlinik features listed below are way superior to presently available solutions but very convenient.

1. Telehealth, Video, Voice (Virtual Care at Home)

2. [Population Health Management](#) Module for Governments with an in-built patient master index (can be used by governments to track the health of its citizens)

3. Mental Health Management Platform (standalone or can be integrated)

4. Bluetooth Medical devices integration like SPO2, Blood Pressure, Total Cholesterol, Glucose Monitors and more can be customized to client needs.

5. A unique Remote Health Care Solution

including a backup with all necessary diagnostic instruments can be customized to suit relevant needs

6. Complete consumer health management module, Patient EHR, Trackers, Knowledge bases, Activity trackers and more.

“ choosing the right partner was critical when many telehealth platforms are available but the easiest decision was when I learnt that Smart Klinik isn't done by just techies but also with medical pros.”

*Christopher Rockson, CEO  
Orange Healthcare*

7. Doctors EMR, Appointment Management, Patient Scheduling and more.

8. Have prescriptions delivered at the pharmacy of your choice

9. Dietician / Nutritionist EMR - Diet Planning

10. Health Coach / Exercise Planning / Planner – A complete fitness standalone solution.

In addition to a Health Wallet which can be integrated either on the Visa / MasterCard network or even connected to the Insurance company of your choice.

Mitish, CEO of Health5C's added that while it is unfortunate

that people are losing lives and jobs in this pandemic. Telehealth has seen a major growth and adoption during this unprecedented time. We expect in the new normal that telehealth will be [THE CHANNEL](#) to consult. Doctors have also begun to astutely move towards the tele-consult platform and adoption is increasing rapidly. Number of consults have increased over last few months and we are experiencing a new flow of enquiries from Governments, Insurance companies and even Global Management firms to work with them and enable telehealth for their own networks. We are presently expanding along with our partners to obtain licenses and

Mitish Chitnavis, CEO Health5C Wellness Solutions (P) LTD

necessary permissions to launch across 5 different countries.

Telemedicine in Ghana is one of many examples that demonstrate the value of digital health in improving healthcare systems in developing countries. ICTs have the potential to address several of the health challenges facing developing countries by providing cost-effective solutions. quipped Christopher Rockson, CEO Orange Healthcare.
