

Global Stem Cells Group To Start Training Physicians In Lisbon, Portugal as Early as Sep. 2020

The Global Stem Cells Group has at last finalized discussions to open a The Stem Cell Center Network site in Lisbon, portugal.

MIAMI, FLORIDA, UNITED STATES, August 25, 2020 /EINPresswire.com/ -- The [Global Stem Cells Group](#) has at last finalized discussions to open a [The Stem Cell Center](#) Network site in Lisbon, portugal. The Stem Cell Center operates an international network of regenerative medicine practitioners that is dedicated to sharing information with the end goal of bringing cutting-edge regenerative medicine-based treatments to patients suffering from debilitating disease.

Pictured above is a variety of physicians and medical professionals receiving an On-Site training in regenerative medicine practices, being taught the same protocols that will be offered in Portugal.

The new Portuguese Stem Cell Center will be comprised of a highly-accredited, state of the art clinic/laboratory manned by physicians and scientists with combined decades of experience. It will be another strong foothold in Iberia for the global company, and carries with it full license to use the Group's proprietary treatment methods and branding designs.

This will be the Global Stem Cell Group's first permanent location in Portugal, rounding out the company's presence in Western Europe and the Portuguese-speaking market with the new Lisbon-based partnership. The Stem Cell Center Network continues to roll out new membership opportunities, programs, and events, and our membership has grown steadily year after year-- To date, we are present in twenty five countries and five continents.

And to commemorate this partnership the Stem Cell Network has plans to open the clinic in September of 2020, and begin training physicians shortly after. "We've wanted to expand into Portugal for a very long time," Said Benito Novas, Founder and CEO, Global Stem Cells Group,

“Now that the world is tentatively opening up, it seemed like a good time to resume teaching physicians-- after all, with more people getting sick, it is important for their doctors to have all the tools at their fingertips to help,”

Barring any extenuating circumstances, the Stem Cell Center Network remains scheduled to open in the first week of September, with bookings already being accepted for the Network's inaugural training at this clinic. With limited availability due to current social distancing efforts, spots are filling up quickly, and prospective applicants are encouraged to sign up soon for the hands-on training course.

With the world opening up, it seemed like a good time to resume teaching physicians-- after all, with more people getting sick, it is important for doctors to have all the tools they need to help,”

Benito Novas, CEO, Global Stem Cells Group
