

The First Luxury & Ethical Skin Conscious Sanitising Serum - Made in Bath Spa, England

The premium hand sanitiser with oils to neutralize the drying effect of alcohol with natural scents, leaving hands protected, hydrated and refreshed.

CAMBERLEY, SURREY, UNITED KINGDOM, September 7, 2020 /EINPresswire.com/ -- The premium hand sanitiser with moisturisers to neutralize the drying effect of alcohol with natural scents, leaving hands protected, hydrated and refreshed. Made in Bath Spa, England using only sustainable, ethical production and natural ingredients. A sanitising 'tonic' with care for skin – skn+tnc.

.....

Emily Grice saw the drying effect sanitisers were having on her 2 year old son at nursery 10 years ago and used vitamin E to soothe and repair the open cracks that developed after repeated use.

Covid then hit this year and Emily went back to the kitchen table and mixed a batch of sanitiser with oil, essential oils and natural perfumes. The long term effects of the common sanitisers were doing the same damage Emily had seen on her sons hands so skn+tnc was conceived.

Skn+tnc Luxury Sanitiser comes in 300ml glass, made with natural and ethical vegan ingredients

skn+tnc
SANITISING SERUM

The brand logo - a sanitising serum to care for your hands and health

Skn+tnc is produced in Bath Spa, England with only natural and ethical vegan ingredients and cruelty free practices. Sustainability has been the core focus using a refillable glass bottle. The product will be launched in 300ml glass with refill formats to follow. Travel sized bottles will also be available.

The skn+tnc formula includes 70% alcohol, for everyday virus protection. The inclusion of moisturiser is intended to neutralize the alcohol's drying effects on the skins but will not leave hands sticky. Skn+tnc is also scented gently with natural ingredients leaving the user with fresh smelling skin, making hand sterilisation a positive experience.

skn+tnc comes in a selection of formats. Launching initially in just 300ml. But refills will also be available in recycled materials to ensure sustainable practices.

Sanitising your hands need not be something we do begrudgingly. Users will want to sanitise, which is expected to create a step change in the use and experience of 'staying safe'.

“

Sanitising our hands is now a way of life. This carefully formulated serum hopes to change the experience, but also care for hands which are increasingly becoming damaged - and all ethically produced.”

Emily Grice - Founder

Skn+tnc is set to be launched in November 2020 for distribution online at sknandtnc.com, on Amazon, and through social channels. Skn+tnc will also be available at premium retailers across the UK and then in the US in 2021. Contact our office below for trade orders.

- Skn+tnc has an estimated RRP of £28.50 for 300ml.
- Currently it comes in one variant with more to follow in early 2021.

Retailers or trade interested in bulk purchase should

contact our offices for further information, pre-ordering and samples - available in November 2020.
