

Disposable Latex Gloves Market in India By Current Scenario to Expand at Significant CAGR of 5.8% By 2027

The demand for disposable latex gloves from the healthcare industry for protection of healthcare workers involved in the treatment of Covid-19

PORTLAND, OREGON, UNITED STATES, September 10, 2020 /

EINPresswire.com/ -- `According to the report published by Allied Market Research, the [india disposable latex gloves market](#) generated \$181.2 million in 2019, and is estimated to reach \$282.8 million by 2027, registering a CAGR of 5.8% from 2020 to 2027. The report offers an extensive analysis of changing market dynamics, key winning strategies, business performance, major segments, and competitive scenarios.

Surge in demand for disposable latex gloves from the healthcare industry for protection of healthcare workers involved in the treatment of Covid-19 and other patients drives the growth of the india disposable latex gloves market. However, health risks associated with powdered latex gloves hinder the market growth. Furthermore, government initiative such as “Vocal for Local” to encourage indigenous production of disposable latex gloves is expected to create new growth opportunities for market players during the forecast period.

Covid-19 scenario:

- The demand for disposable latex gloves from the pharmaceutical industry has been increased during the Covid-19 pandemic. This is due to surge in usage of these gloves to prevent cross-contamination while manufacturing medicinal products.
- During the pandemic, the Indian government is now focusing on local production of gloves rather than importing them from other countries.

The demand for disposable latex gloves from the healthcare industry has experienced a huge growth to protect the healthcare workers involved in the treatment and care of patients with Covid-19.

The report offers a detailed segmentation of the india disposable latex gloves market based on product, distribution channel, and application.

Based on product, the sterile segment contributed to the largest share in 2019, accounting for nearly three-fourths of the total share, and is estimated to maintain its dominant position during the forecast period. However, the non-sterile segment is estimated to portray the highest CAGR of 6.5% during the forecast period.
