We prefer to make our crowns in-house because we have more control over their fit and color.”

Crowns from the [Springfield dentist](#) start at only \$500. Using an in-house CEREC milling machine, the crowns can be placed in as little as two visits.

“We prefer to make our crowns in-house because we have more control over their fit and color,” explains Dr. Katie Alger, owner and operator of DICE.

Crowns can be used to replace one missing tooth; however, DICE also offers 3-unit bridges for \$1500. These bridges replace three missing teeth in a row and are a popular alternative among patients who may not qualify for dental implants. Other more minimally invasive treatment options include veneers and Maryland bridges.
