EINPresswire.com/ -- “In the Eye of An Eagle” by John Henry Hardy has been released worldwide. This 248-page novel presents a fictionalized version of the current American political reality, and looks toward the potentially devastating consequences of a 2020 presidential victory by the left. Rooted in real world events, this story serves as a warning for the future, and a call to action for those who oppose the ideals of the political left.

In the Eye of An Eagle (ISBN: 9781735698304) can be purchased through retailers worldwide, including barnesandnoble.com and Amazon. The paperback retails for \$14.99. Wholesale orders are available through Ingram.

From the back cover:

So you think another civil war can't happen in the good old USA, Mr. John Q. Public? Civil war results when you don't accept the results of a national election, and the left has refused to accept the outcome of the 2016 Presidential election!

As a result, chaos now reigns all across the country! The left urged their supporters to kick their political opponents when they are down, confront them in public, get in their faces, run them out of restaurants, terrorize their families, and harass them on the street. Sections of cities are being burned by mobs, stores are being looted, and murder and other crimes against individual citizens are rampant in the sanctuary states as a result of defunding the municipal police departments.

This tale you are about to read depicts what could happen to an average American family and to our country, if the left wins the 2020 presidential election.
