PUNE, MAHARASTRA, INDIA, September 23, 2020 /EINPresswire.com/ -- Furfuryl Alcohol Market:

## Executive Summary

Furfuryl alcohol is an organic compound comprising a furan replaced with a hydroxymethyl group. It is a colorless liquid, but old samples appear amber in color. It possesses a faint odor of burning and a bitter taste. The compound is unstable in water but soluble in common organic solvents. The organic compound can be produced from waste vegetable materials such as corn cobs, oat hulls, cane bagasse, rice husk, and others. The market growth is primarily driven by growing utility of furfuryl alcohol in numerous applications such as wetting agents, chemical feedstock for five membered oxygen heterocycles, solvents, adhesives, foundry resins and others. Moreover, the use of furfuryl Alcohol as a bio-fuel propels a boost in the demand during the forecast period. As owing to the declining reserves for fossil fuels the alternatives are being developed such as bio fuels to power huge machines mainly rockets in which combination of concentrated nitric acid and furfural alcohol are used as propellants. For Instance: AS per the Energy International Association, the US produced 15.78 billion of ethanol biofuel equivalent to 375.63 million barrels in 2019. Further, US consumed 14.54 billion gallons in the same year equivalent to 346 million barrels. Additionally, favorable governments mandates regarding green chemical production are further likely to propel the demand for furfuryl alcohol over the forecast period. However, fluctuations in raw material prices may hamper the over the forecast period of 2020-2027.

The objective of the study is to define market sizes of different segments & countries in recent years and to forecast the values to the coming eight years. The report is designed to incorporate both qualitative and quantitative aspects of the industry within each of the regions and countries involved in the study. Furthermore, the report also caters the detailed information about the crucial aspects such as driving factors & challenges which will define the future growth of the market. Additionally, the report shall also incorporate available opportunities in micro markets for stakeholders to invest along with the detailed analysis of competitive landscape and product offerings of key players. The detailed segments and sub-segment of the market are explained below:

By Application:

Resins

Solvent

Corrosion Inhibitors

Others

By End-Use:

Foundry

Agriculture

Paints & Coatings

Pharmaceuticals

Food & Beverages

Others

By Region:

North America

U.S.
