

# Hyper-Converged Infrastructure Market Expected to Reach \$33.16 Bn by 2026 | CAGR 30.7%

*Rise in requirement for disaster recovery and data protection along with lowered CAPEX and OPEX drive the global hyper-converged infrastructure market*

PORTLAND, OREGON, UNITED STATES, September 28, 2020 /

EINPresswire.com/ -- Increase in the requirement for disaster recovery and data protection along with lowered Capital Expenditure (CAPEX) and Operational Expenditure (OPEX) fuel the growth of the global hyper-converged infrastructure market. Based on industry vertical, the BFSI segment held the major share in 2018. Based on the region, on the other hand, Asia-Pacific is projected to manifest the fastest CAGR of 36.3% throughout the forecast period.

Hyper-Converged Infrastructure Market

The global hyper-converged infrastructure market in 2026 has witnessed significant growth due to its ability to utilize commodity hardware which in turn reduced the Capital Expenditure (CAPEX) and Operational Expenditure (OPEX) significantly.

Covid-19 scenario-

- As the BFSI sector dominates the hyper-converged infrastructure market, it didn't have an immediate impact on the outbreak of the pandemic. The market has almost managed to remain unscathed and show favorable growth opportunities.
- Moreover, with more and more financial organizations adopting cost optimization projects to serve the increasing demands from customers even during a lockdown, the global market has not been highly affected by the pandemic.
