PORTLAND, OR, USA, October 5, 2020 /EINPresswire.com/ -- [DejaOffice CRM App](#) with Outlook Sync has been

updated for iOS 14 and the exciting new iPhone 12 line. Among the new features is a DejaToday widget that gives you appointment and task info on your iPhone home screen.

CompanionLink Software, the makers of DejaOffice, offers sync tools for Microsoft Outlook, Act!, GoldMine, and Palm Desktop.

Full featured CRM for iPhone 12

“We are pleased to fully support Apple in their 2020 release,” says Wayland Bruns, CTO of DejaOffice. “Mobile professionals need more than Apple provides for a Contact Manager. DejaOffice can display Contacts by Company Name, Category, File-As and by Location. It contains a full functioned integrated task list, and allows you to connect each Activity to a Contacts. DejaOffice provides USB, Wi-Fi and DejaCloud sync directly to the iPhone so data is not shared with corporations that use it for marketing purposes. Finally, CompanionLink offers effective telephone technical support which is very rare in these times. If you need help with configuration or data transfer, having a real phone number to a US based technician is a huge time saver.”
