Due to the imminent needs of the Autism community at large and the drastic change in the educational system, Connect Plus Therapy is equipped to offer families a space to support their child in a productive manner for extended periods of time. Connect Plus Therapy is dedicated to working with clients in both a 1:1 format and social group environment. We work together with early intervention teams, special educators, and other related service providers in your child's life to promote a whole-person approach to treatment.

The new clinic is open for clients so they can continue to receive ABA services in more than one setting (home and clinic). Connect Plus is also accepting new clients, through private insurances in NJ, the Greater Philadelphia Area and Southern Florida with more locations scheduled for the coming year.

Connect Plus Therapy home, center and community-based ABA services are person centered and family driven. We take the time to do an intensive planning process to focus on the socially relevant goals personalized to your child's needs.
