

# Methanol as a Fuel for India's Inland Waterways - 8 October

DELHI, INDIA, October 6, 2020  
/EINPresswire.com/ -- The "[Methanol as a fuel for India's Inland Waterways](#)" webinar organized by the Methanol Institute (MI) will take place on October 8, 2020, at 1700HRS (IST).

This webinar will feature speakers Commander Praful Tayal (Former Chairman, Central Inland Water Transport Corporation (CIWTC)), Sebastian Verhelst from Lund University, and Bengt Ramne from ScandiNAOS AB.

As India looks to strengthen the country's energy security by diversifying its energy products, methanol has been recognized as a strategic alternative fuel. The country has made domestic production of methanol a focus to embrace and align with self-reliant policy or Atma Nirbhar Bharat. Methanol can be readily produced in India from a variety of feedstocks like coal and biomass.

This webinar will focus on how methanol can work to modernize India's ports and fast track waterways. The 2016 National Waterways Act marked the start of a massive project to move more freight and passengers along India's intricate inland waterways. Methanol can support this vision of Government of India (GoI) by being a fuel that could reduce inland shipping's impact on the ecosystems of rivers and improve air quality around rivers, while protecting the livelihoods and quality of life of many communities that live along India's rivers.

Ms Prakriti Sethi

The banner features a central image of a cargo ship on a waterway. To the right, the text reads: "METHANOL AS A FUEL FOR INDIA'S INLAND WATERWAYS" and "THURSDAY OCTOBER 8, 2020 1330 CET | 1700 IST". Below this, there are four circular portraits of the speakers and moderator, each with their name and title. The speakers are Commander Praful Tayal, Sebastian Verhelst, and Bengt Ramne. The moderator is Tim Chan. Logos for Lund University and Methanol Institute are also present.
