

Secured Communications LLC Expands its UK and Europe Team

Global Encrypted Communications Company Appoints Sam Denison as UK Business Development Representative

LONDON, UNITED KINGDOM, October 9, 2020 /EINPresswire.com/ -- Global cyber-security company [Secured Communications](#) LLC has appointed a new UK based business development representative to work on UK and European projects opening new industry markets.

From his base in London, Sam Denison will work on business development for the US tech-company whose class leading corporate product [Mercury](#) is an enterprise software suite that allows users to host private and secure videoconference meetings via a web browser or mobile device without the risk of disruptions or leaks of sensitive information. The introduction of Mercury into [UK and European markets](#) will help businesses increase productivity and minimise the risk of losses through information hacking, reputational damage and data breach.

“

Secured Communications' proposition was compelling to me because the company puts security and privacy first.”

Sam Denison, Business Development

Sam Denison, Secured Communications

Sam, 24, who graduated with a first class honours LLB Law degree from Edinburgh University, said: “Secured Communications' proposition was compelling to me because the company puts security and privacy first. I am of a generation that is being forced to confront the privacy implications of incessant data harvesting across the sites

that dominate our lives and so I fully support projects which put users back in control of their data. This is a very exciting time to join Secured Communications, as they continue to develop the products even further with new interfaces and more features imminent.”

Mercury's highly secure, AES-256 encrypted video and audio-conferencing product for businesses is based on technology already trusted by many law enforcement agencies around the world.

The technology behind the product has been successfully used in the US during major events including the Super Bowl, NASCAR, the Stanley Cup playoffs and many more security operations.

Former UK police chief and head of counter terrorism, John Parkinson OBE, is president of the company.

He said: "We are delighted to welcome Sam onto the team. He is a very talented individual who is passionate about privacy and security and will be an asset to the company as we continue to expand and develop new markets."

Headquartered in San Francisco, California, Secured Communications operates globally and has bases in the UK, Canada and Australia.
