

Interpaylink and iDenfy are Collaborating to Provide Traders with Seamless Yet Secure Online Payment Solution

iDenfy commits to provide Interpaylink with an advanced identity verification solution to verify its customers' identity remotely.

KAUNAS, LITHUANIA, October 13, 2020 /EINPresswire.com/ -- Interpaylink is a well-known online payment brand running under the supervision of the company named International Payment Union. The company offers a wide range of services to make the lives of traders pretty easier. These services include global payment, currency exchange, and multi-currency accounts. Interpaylink is issued with an electronic money license from the Bank of Lithuania.

The company aims to offer traders of Europe and Asia seamless yet secure payment options. Therefore, they have tied up with iDenfy, that will be helping them conduct ID verification of their customers.

Interpaylink allows traders and investors to receive payment in 39 currencies and send payments in 73 currencies worldwide. However, since they can't meet its Asian clients (doing business in Europe) face-to-face, the company authenticates their identities using iDenfy's AI-enabled identity verification solution.

iDenfy is a renowned identity verification solution provider based in Lithuania, offers remote verification solutions to individuals and businesses across the globe. The company will enable Interpaylink to check and authenticate the ID documents of its users remotely. iDenfy helps them conduct verification using a reliable non-F2F identity verification solution and gratify all the EU technical and legal requirements.

iDenfy has an advanced ID detection solution capable of analyzing 1300 types of government-issued ID documents from more than 200 countries. With this advanced feature, the identification of Asia-pacific clients will be much easier.

Interpaylink is quite excited about this partnership because it will make their operations and onboarding process smooth for its Asia-pacific clients operating in Europe.

Gvidas Grinkas, the CEO of Interpaylink, says, "I'm sincerely happy for choosing iDenfy. The quality of the outsourced iDenfy service we get matches the quality of such world-known brands as DowJones we use for PEP/Sanctions screening. And we are looking to long-term cooperation with iDenfy's friendly and helpful team".

On the other hand, iDenfy is also very much pleased to enter into this new partnership. Domantas Ciulde, the CEO of iDenfy, states that we are super excited about the new partnership. It's our honor that we're partnering with such a renowned global payment company. He further says, "We promise that we will strive to provide the best identity verification solution so that Interpaylink can go beyond all geographical borders to offer their online payment services".

Interpaylink has integrated its mobile app with iDenfy. iDenfy takes a picture of the client and their ID document to check whether they are tampered or forged. This data is sent to interpaylink's server and from where they can retrieve it anytime.

According to Interpaylink, the partnership brings smooth onboarding for them as well as their clients. They further say that iDenfy is helping them break geographical borders for payments and proceed towards global growth.
