

# DONY COVID Face Mask Covering wholesale to Saudi Arabia, Egypt, UAE, Qatar, Morocco, Kuwait, Oman, Jordan, Bahrain

*DONY's Customizable Face Mask Is Breathable, Designed for Maximum COVID-19 Protection and FDA - CE - TUV Certified.*

HO CHI MINH, VIETNAM, October 13, 2020 /EINPresswire.com/ -- A new, affordable mask is available to combat COVID-19 and it's FDA certified and reusable up to sixty uses with an antibacterial rate of more than 99%.

A forward-thinking company, DONY, is ready to help the world fight the Coronavirus. The face masks designed by DONY have several advantages and is the only face mask that can reusable 60 times but with a fashionable response to today's current social market. The antibacterial material is also water-resistant and comes in medical packaging. The design also is breathable with a special v-shape design to accommodate the nose. A media reel on the mask may be viewed here:

"The time is right for a [better kind of face mask](#), and Viet Nam is the right country to provide it. In the past, the world turned to China when it needed massive quantities of consumer products," notes Pham. "The COVID-19 pandemic changed that a bit and the ongoing trade war between China and the US have inhibited Chinese production of PPE even more.

Other countries have been catching up to China's manufacturing capacity: we can now produce nearly a quarter-million DONY Masks a day when needed. We do it with a degree of precision and quality control that larger Chinese manufacturers can't match, and with the same low overhead, government support, and access to global shipping channels that China is known for"

DONY Garment Vietnamese Garment Factory  
Supplier - Apparel Clothing & Textile Manufactured

- Henry Pham - CEO Dony Garment.

The DONY masks are able to sustain anti-bacterial capability up to 99,9% even after 60 washes, something that no other mask on the market has reached. Like toothbrushes, DONY recommends changing out the mask every two to three months. There is a money-back guarantee for these masks and they can be customized with logos for many businesses and sports teams. Additionally, an indicator strip shows the wearer if the mask has been sterilized. Not only is the logo option a huge bonus for businesses and sports teams, knowing employees are wearing a sterile mask that is FDA certified for safety prevents liability for companies.

“The DONY mask offers unbelievable protection from COVID-19 and other viruses, and it is comfortable to wear. We know health professionals are going to embrace this product because of the many benefits associated with it and because this mask is affordable,” finished Pham.

“

The time is right for a better kind of face mask, and Viet Nam is the right country to provide it.”

DONY MASK - premium antibacterial cloth face mask (washable, reusable) with CE, FDA, TUV Reach, DGA Certification

[DONY COVID-19 prevention face mask](#) offers in-package sterilization and it is breathable. The product is available for safe import and offers UV protection, and filter dust particles & Fungi-proofing as added benefits.

COVID-19 spreads mainly among people who are in close contact with one another, usually within six feet. The use of masks is particularly important in settings where people

are close to each other or where social distancing is difficult to maintain, which is why masks are recommended and- in some states- even mandated. Businesses have to still operate in these mandated states and they can make sure they don't have employees falling ill to COVID-19 due to the use of flimsy masks that meet the minimum standard. Further, the DONY mask helps companies, such as restaurant owners, from any liability resulting from person-to-person COVID-19 transfers between guests and staff.

The DONY mask is available in a variety of colors and for bulk orders. It has three layers of protection that are well-thought-out in design and comfort. These layers filter out dust, germs, and bacteria. The DONY mask designs are also unisex. Additionally, Dony provides distribution for B2B purposes and even exclusive partnerships. The company can provide free samples, trial orders, wholesale orders, bulk orders, and custom orders with branding opportunities for logos and labels. Businesses can either use the branding opportunities for use from their employees or create merchandise for their customers or fans to buy. Additionally, DONY has exclusive distribution in Saudi Arabia, Australia, Belgium, Malaysia, and UAE.

**DONY MASK** - premium Covid antibacterial cloth face mask (washable, reusable) with CE, FDA, TUV Reach, DGA Certification

Business owners also appreciate the DONY mask because it is the safest product available with an FDA clearance that also does not have an opening. Valves and vents can be problematic. These types of one-way valves or vents allow air to be exhaled through a hole in the material, which can result in expelled respiratory droplets that can reach others. This type of mask does not prevent the person wearing the mask from transmitting COVID-19 to others because of the openings.

The DONY masks are different because of the design and because of all the clearances and accolades provided by the medical community. Business owners appreciate the three-layer design, which is purposeful. The first layer is completely water-resistant and can guard against human droplets, reducing the potential for transmitting a viral infection. The middle layer fights to protect the wearer from air dust, tiny particles, and other harmful agents from entering users' nose and mouth. People with asthma will find this mask not only comfortable but dually beneficial. The third layer is where the magic happens and why so many business owners and people are happy. This layer prevents 99.9% of bacteria from entering one's system.

The strap of the DONY mask also helps those who have to wear facial personal protective equipment (PPE) for long periods of time. The elastic band can stretch 270 percent of its original length, helping to prevent agitation of the chin or the ear.

Business owners have an opportunity to keep their employees and customers safe by buying the DONY mask during a time when the COVID-19 pandemic is still a top concern. Business owners can utilize these masks as a way to market their brand and company without spending a lot of

money on an advertising campaign to say “we care”.

Regardless of how big or small a business is, ordering the DONY mask ensures safety. The mask is revolutionizing the PPE market without taking advantage of the customer or selling a fashion statement. The DONY mask answers a need during these unprecedented times, helping to enforce [CDC guidelines](#) and affording people and business owners to continue on with their day-to-day routines in an effortless manner.
